

# Today's Drive Toward Better Quality Control

Join us for a virtual webinar, focused on the next generation in quality management for blood gas testing to ensure quality and compliance. Defining quality standards, and methods for control will be discussed. Live Q&A to follow.

## Speaker

### Sten Westgard

Director of Client Services and Technology  
Westgard QC, Madison, WI  
Adjunct Faculty Member  
Mayo Clinic School of Health Sciences, Rochester, MN  
University of Alexandria, Egypt

## Objectives

- Identify strategies to address the risks of variability in sample collection, for enhanced patient safety
- Review quality-by-design
- Discover how quality-by-design can help achieve higher quality in blood gas testing
